

7 January 1960

Dear Dan:

Your approval is hereby requested to purchase one X-295 Traveling Wave tube with Type N connectors. This tube is used in the L band radar and has a life expectancy of about 600 hours. It was necessary to replace a recent tube failure with the only spare we had on hand. Consequently, in order to prevent a serious delay in operations, we should have one spare. It is estimated the tube will cost about \$2,000.

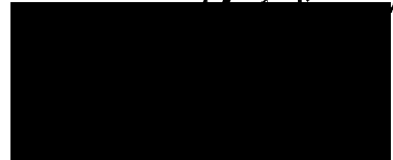

Very truly yours,

*hy*
